Thread Protectors

Injection Molded

H & H Seal and Products maintains inventory of thread protectors in various threads, such as EUE, Hammer Union 1502 and LCT and BCT threads. Injection molded from (HDPE) High Density Polyethylene.

Material

HDPE is known for its large strength-to-density ratio. The density of HDPE can range from 0.93 to 0.97 g/cm³ or 970 kg/m³. Although the density of HDPE is only marginally higher than that of low-density polyethylene, HDPE has little branching, giving it stronger intermolecular forces and tensile strength than LDPE. Giving HDPE a higher specific strength. It is also harder and can withstand somewhat higher temperatures (248 °F for short periods, 230 °F continuously)

Drill Pipe Protectors

Additional Products

- Fasteners
- Gaskets and Packings
- Spring Energized Seals
- Banding Clamps
- Hydraulic Seals
- O-Ring Elastomers
- Back-up Rings
